5D: Conant-Acres Valiant Gaye EX92 2E
6D: Conant-Acres Elevation Goldie VG88 70 tonnes
7D: Conant-Acres Tim Goldmine EX92

Family Information

The Gaye family has been developed strongly in the UK since Blackstar embryos were imported from the USA. This particular line has become a real highlight for anyone visiting Anthony Brouchs renowned Tallent herd in Cumbria where both GOLDMINE's Dam and Granddam are posting high lifetime yields and noted for their great udders, easy care work traits and strong fertility. It has also been a delight to watch these two cows develop from promising two year olds into outstanding, honest herd cows that would grace any dairy unit. GOLDMINE'S first milking sister has scored VG as a two year old.

Daughter Information

GOLDMINE is an outstanding udder bull, leaving seriously well attached mammaries, dipped in veins and finished with silky texture. Teats are placed in the centre of each quarter and importantly will add length to matings. Daughters have that classic dairy wedge, with stylishly cut frames and flat, open ribs. He will add curve to the leg set which will work well on many of today's top bloodline combinations, and expect him to add a big chunk of milk from daughters that can achieve high performance easily

Mating Information

GOLDMINE is a calving ease sire and will work really well on Mtoto and Outside and Oman bloodlines. He will cross ideally on daughters of REECE, SHOTTLE, NORTHSIDE, PADBURY, MELODY, ALTON and MANGO.
